Robert "RJ" Michael

Objective

I will obtain a Bachelor's degree in Computer Science and Engineering. Afterward, I plan to study artificial intelligence/machine learning in grad school. I look forward to learning and building relationships along the way. I also plan to help educate, inspire, and mentor young students in Alaska about Computer Science.

Professional Experience

CSCE Tutor / Lab TA 08.2023 – present

University of Alaska Anchorage

- Support students and assist them in gaining practical study skills and maximizing their potential for academic success in Computer Science topics.
- Lab TA/Grader for 35 students in CSCE A201, a class that introduces fundamental computer programming techniques and problem-solving. It ranges from basic syntax to interactive execution using C++.

Systems Engineering Intern 05.2023 – 08.2023

Arctic IT

- Gained a basic understanding of IT security and the process behind it with the Google cybersecurity certificate through Corsera and Microsoft 365 Security Center and Defender through Microsoft Learn.
- Carefully analyzed client devices, accounts, firewalls, user permissions, security logs, and alerts.
- Created a recommendation report for three clients and presented it to the Security team

Program Coordinator 10.2020 – 09.2022

Southcentral Foundation Anchorage

- Works closely with the operations team to ensure clinic runs efficiently by communicating and suggesting ideas to improve work flow.
- Communicates with all 60 clinic employees for any updates or needs that they request.
- Organize social events for clinic staff. This includes placing orders, driving to location, and setting up.
- Order supplies for the clinic ex: medical devices, general office supplies, computers/laptops, phones, etc.

Education

BS in Computer Science and Engineering Expected Graduation 05.2025

University of Alaska Anchorage

Diploma 05.2017

Bethel Regional High School
